SCRUM ALLIANCE®
AGILE COACHING SKILLS - CERTIFIED FACILITATOR (ACS-CF)
Learning Objectives

January 2023

OVERVIEW AND PURPOSE

The goal of the Agile Coaching Skills - Certified Facilitator (ACS-CF) certification is to grow the learner's mindset, knowledge, and ability in professional facilitation. Effectively facilitating a group or team toward co-created and meaningful outcomes is a core agile coaching competency as well as a skill necessary for effective leadership in agility.

The model for the ACS-CF certification allows approved education providers autonomy to choose how they deliver the program in a way that will provide the most impact for their participants. Each Educator will also design hands-on facilitation practice and reflection. Please note that the ACS-CF certification will be updated as Scrum Alliance gathers feedback from learners and Educators.

This certification grew out of the Agile Coaching Growth Wheel. Although it stands apart from the wheel, the skills and competencies of the "Facilitation" slice of the wheel inspired this certification.

SCOPE

Delivered by an approved Guide-level practitioner, this certification offering develops the skills and mindset needed for facilitation. This course expands the learner's mindset, knowledge, and ability in professional facilitation, including hands-on facilitation practice as well as a focus on the orientation of the facilitator and facilitating through conflict.

Participants in ACS-CF certification should expect that each learning objective outlined in this document will be covered over the course of the program. The ACS-CF Learning Objectives fall into the following categories:

1. Setting the Stage
2. Understanding the Group's Context and Needs
3. The Orientation of a Facilitator
4. Facilitating through Conflict
5. Forwarding the Action
6. Facilitation Practice

A note about Bloom's Taxonomy:

Bloom's-style Learning Objectives describe what the learner can do upon completing the offering. Please mentally start each Learning Objective with the following phrase: "Upon successful validation of the ACS-CF Learning Objectives, the learner will be able to … "

Bloom's style of Learning Objectives consist of six levels of learning:

- **Knowledge**
- **Comprehension**
- **Application**
- **Analysis**
- **Synthesis**
- **Evaluation**

The levels progress from lower- to higher-order thinking skills, Knowledge through Evaluation. The level of each Learning Objective can be identified using the image designations above.

LEARNING OBJECTIVES

Setting the Stage
