Putting Agile and Scrum to Work
Want to transform your world of work?

It’s possible with Agile and Scrum.

This whitepaper will help you understand what Scrum is, how it works, and how it can enhance your own productivity to increase performance.

What are Agile and Scrum?

Agile is an approach for getting work done by the collaborative effort of self-organizing and cross-functional teams, encouraging flexible response to change.

Scrum is an Agile framework that’s been used to manage work on complex products since the early 1990s. Scrum is not a process, technique, or definitive method. Rather, it’s an outline to refer to while employing various processes and techniques.

Teams complete tasks in set periods of time called Sprints, typically less than 30 days each, with daily reassessments of progress and status. This approach is effective in overcoming obstacles often presented by unexpected challenges, including evolving customer input.

People aren’t happy because they’re successful. They’re successful because they’re happy.”

– DR. JEFF SUTHERLAND, co-creator of Scrum
What can Scrum and Agile do for me?

**TOP 3**

- You’ll be **more productive**
- You’ll find that short-term **goals are easier** to manage and attain
- You’ll have the opportunity to **make more money**

What can Scrum and Agile do for my company and projects?

**TOP 3**

- You’ll produce a higher **quality of work** at a lower cost (better ROI)
- You’ll have higher **customer satisfaction**
- You’ll enjoy increased **team collaboration** and morale

**FUN FACT**

The term “scrum” comes from a 1986 Harvard Business Review article in which the authors made an analogy comparing high-performing, cross-functional teams to the scrum formation used by rugby teams.

"Companies are increasingly realizing that the old, sequential approach to developing new products simply won’t get the job done. Instead, companies are using a holistic method — as in rugby, the ball gets passed within the team as it moves as a unit up the field."

– HIROTAKA TAKEUCHI and IKUJIRO NONAKA
“New Product Development Game”

How are Scrum and Agile different?

The “WHY”

Many organizations use a traditional top-down project management approach, also known as Waterfall. Despite the name, this technique is not always the most fluid way to go. Waterfall is more of a sequential method; the stages of a project are worked on in a consecutive order, from conception, to design, to implementation. The challenge with the Waterfall methodology is that once one step is complete, it’s almost impossible to go back (and potentially improve) without scrapping the whole project. This approach costs time and money.

Enter the Agile approach. As the most widely used framework within Agile, Scrum is used to break down complex projects into smaller pieces, thereby allowing your team to continuously deliver value on a more frequent basis. It’s a more collaborative and flexible approach, so you can respond to your client’s evolving needs and changes in the market. It’s common for customer needs to evolve throughout the course of any project, and the Scrum approach enables more adaptability.

Basic Scrum Project Team Roles

The “WHO”

**ScrumMaster**

The ScrumMaster helps the Scrum Team perform at their highest level. They fully understand the underlying principles of Scrum and can effectively apply them in complex, real-world situations. They ensure that goals and scope of projects are clearly understood and work to remove impediments to progress.

**Product Owner**

The Product Owner role is typically for those who are closest to the “business side” of projects. They are expected to do the best possible job of satisfying all stakeholders, maintain the Product Backlog, and ensure that everyone knows the priorities.

**Development Team**

Development Teams are structured and empowered to organize and manage their own work. The resulting synergy optimizes the Scrum Team’s overall efficiency and effectiveness.
Product Backlog
The Product Backlog is the organization of items that guides what’s most important to focus on and build next. The Product Backlog is constantly being updated and refined.

Sprint
At the heart of Scrum is the Sprint, during which a usable and potentially releasable product increment is created. Sprints are usually one week to one month in length, and happen one right after the other to keep projects moving. There are three events (ceremonies) that happen with each Sprint:

- **SPRINT PLANNING**
  The team decides what to work on for the current time-boxed period.

- **SPRINT REVIEW**
  The team collaborates about what was done and adapts the Backlog as needed.

- **SPRINT RETROSPECTIVE**
  The team discusses what went right, what went wrong, and how to improve.

Daily Scrum (or Daily Stand-up)
Daily Scrum (think “daily status meeting”) is the heart of the framework. Daily Scrums highlight and promote quick decision-making, and they improve the Scrum Team’s level of transparency and knowledge. The Daily Scrum is short — averaging about 15 minutes — so the team tends to be highly focused.

The Scrum Alliance® Difference
Scrum Alliance — the largest, most established, and influential nonprofit professional membership and certification organization in the Agile community — exists to transform the way we tackle complex projects, bringing the Scrum framework and Agile principles beyond software development to the broader world of work. Our mission is to guide and inspire individuals, leaders, and organizations with practices, principles, and values that create workplaces that are joyful, prosperous, and sustainable.
Why pursue a Scrum Alliance certification?

We are committed to delivering the highest standards of education. Our more than 200 Certified Scrum Trainers go through an extensive set of peer reviews, testing, training, and interviews. Scrum Alliance training and certification is world renowned for its consistency, quality, innovation, and experienced instructors.

Our certifications are globally recognized as evidence of the highest Agile and Scrum knowledge. They demonstrate your professional knowledge and can lead to higher earning potential. Companies choose Scrum to deliver more value to their customers and their bottom line. They have come to understand the value that a Certified ScrumMaster®, Certified Scrum Product Owner®, or Agile Coach brings to their organization. And they’re willing to pay a premium.

**Improve your organization’s bottom line—and your own salary.**

Professionals who make the decision to adapt to Agile practices — and Scrum in particular — are enjoying a higher income.

According to the 2017-2018 Salary Survey of Scrum Professionals, sponsored by Scrum Alliance, **55% of Scrum professionals saw an increase in their annual base salary from 2016 to 2017.**

In the U.S. alone, salaries usually start over $100,000 and move upward.

---

**Average annual base salaries* regionally (in USD)**

- **EUROPE** $83,245
- **NORTH AMERICA** $116,544
- **SOUTH AMERICA** $56,751
- **ASIA** $70,254
- **AUSTRALIA and OCEANIA** $123,305

* from the 2017-2018 Salary Survey

---

**THE REAL BENEFITS OF CERTIFICATION MEAN YOU CAN...**

- Change your mindset and have the potential to help your organization succeed
- Minimize wasted effort, duplication, and resources
- Stay relevant and marketable across all industry sectors adopting Agile practices
When an applicant has a Scrum certification, we know that applicant will be collaborative and a strong communicator, while being eager to improve processes or bring new ideas.”

— TORRIE MICHAUD
HR Director for BlueCross BlueShield of Arizona

The two foundational certification paths start with Certified ScrumMaster (CSM®) and Certified Scrum Product Owner (CSPO®).

- As a Certified ScrumMaster, you’ll help the rest of the Scrum Team work together to learn and implement Scrum. Along with the Product Owner, you will work to protect your team from both internal and external distractions.

- As a Certified Scrum Product Owner, you’ll monitor projects, keep tabs on priorities, and make sure the best possible job is done to satisfy all clients (a.k.a. stakeholders).

But it doesn’t stop there. You can advance your role-specific skills and evolve as a Scrum professional with an Advanced Certified ScrumMaster (A-CSM®), Advanced Certified Scrum Product Owner (A-CSPO®), Certified Scrum Professional®-ScrumMaster (CSP®-SM), and Certified Scrum Professional®-Product Owner (CSP®-PO), and more!

The Path to Certified Scrum Professional®

Certified ScrumMaster (CSM®) Learning Areas
- Agile and Lean Values, Principles, and Worldview
- Basic Facilitation
- Coaching Fundamentals
- Self-Organization, Team Dynamics, Definition of Done, and Empirical Process Control
- Coaching the Product Owner
- Removing Impediments, Scaling, and Organizational Change
- Servant Leadership

Advanced Certified ScrumMaster (A-CSM®) Learning Areas
- Stakeholder Discussion Facilitation, Starting New Agile Teams, Managing Stakeholders, Facilitate Roadmapping, and Product Discovery
- Value of Engineering Practices and Technical Debt
- Advanced Product Backlog Item Formulation and Product Backlog Management
- Product Management
- Storytelling
- Scaling Scrum
- Lean Organizations (optional)

Certified Scrum Professional (CSP®-SM) Learning Areas
- Lean Thinking
- Advanced Facilitation
- Team Dynamics and Effectiveness, Conflict Resolution, Starting New Agile Teams, Software Craftsmanship, and Coaching the Development Team
- Coaching the Product Owner
- Organizational Development

Advanced Certified Scrum Product Owner (A-CSPO®) Learning Areas
- Stakeholder Discussion Facilitation, Starting New Agile Teams, Managing Stakeholders, Facilitate Roadmapping, and Product Discovery
- Value of Engineering Practices and Technical Debt
- Advanced Product Backlog Item Formulation and Product Backlog Management
- Product Management
- Storytelling
- Scaling Scrum
- Lean Organizations (optional)

Certified Scrum Professional (CSP®-PO) Learning Areas
- Advanced Stakeholder Discussion
- Economics of Product Development Collaboration Frameworks
- Facilitate Product Backlog Ordering and Roadmapping at Scale
- Product Launch
- Customer Development
- Entrepreneurship in an Agile Context
- Advanced Product Discovery
Our global nonprofit association has focused on Agile transformation since 2001

We have certified more than 750,000 practitioners in the global Agile community

Our high standards ensure superlative Agile leadership, guidance, and training
